The Story Behind Pages 2.0

For Happeo, knowledge is power. And keeping knowledge centralized, accessible and up-to-date is how we turn knowledge into organizational productivity.

Pages are one of the key elements of Happeo functionality and a strategic pillar for the future of our platform. Therefore, making the creation and usage of Pages as easy as possible has always been one of the biggest priorities.

We collected customer feedback over time, analyzed it, set priorities and created a plan to revamp our Page builder. We set an ambitious goal to create a class leading content creation (and editing) experience by looking at benchmarks from the world's best CMS and site builders.

We are now happy to launch Pages 2.0 to empower your organization to effortlessly create internal content that looks as good as your marketing website.

The Focus on Development

Fluid Page Creation

Whether you're a novice or a seasoned content creator, Happeo Pages makes building intranet content a breeze. Our user-friendly drag-and-drop interface allows you to easily insert and adjust widgets, and move content between sections to achieve your desired content structure.

Rich Experience

Bring your intranet to life with a diverse catalog of widgets. From embedding videos and images to integrating Google Maps and Calendars, Happeo Pages offers endless possibilities to make your content engaging and interactive.

Always On-Brand

Brand integrity is crucial, and Happeo Pages ensures your intranet content always aligns with your company's visual identity. With customizable Brand Styles and templates, maintaining brand cohesion across all your pages is effortless. Your intranet will be a true reflection of your brand.

Why Pages 2.0?

Better Technology

Pages 2.0 is built on React, a modern web framework that makes your intranet faster, more stable, and more future-proof.

Future Proof

Benefit from ongoing improvements, with new features and performance enhancements rolling out more frequently.

Faster to Load

Experience smoother navigation and quicker page loading times, making it easier to find and share information.

Faster to Build

Creating and updating content is more intuitive with drag-and-drop functionality, helping your team build and maintain pages with less effort.

Easier to Debug

Bugs and issues can be resolved faster with this enhanced technology, keeping your intranet running smoothly with minimal disruption.

Open Source Libraries

Pages 2.0 is more reliable, easier to improve, and built to grow with your organization as your intranet scales.

Timelines

Here's an overview of our Pages 2.0 delivery timeline and what this means for you, your organization, and the original Happeo Pages editor.

Key Dates for Pages 2.0 Rollout

We're rolling out the new Pages 2.0 editor and migration tool in stages. This gradual approach ensures you have the tools and guidance needed before we phase out the original version of Happeo Pages.

April 2025

➤ **Pages 2.0 – General Availability**

Pages 2.0 will be available to your entire organization. You'll have full access to create pages in the new experience, while still being able to use the original editor. Your existing pages won't be affected.

June 2025

➤ **Migration Tool – Closed Beta**

The migration tool will be tested with a small group of customers on limited migrations, alongside technical testing by Happeo to validate performance, reliability, and core functionality.

August 2025

➤ **Migration Tool – Managed Beta**

Testing will extend to select customers based on readiness and functionality needs to test the tool at scale. This 8-week guided program includes weekly sessions and support from our team.

October 2025

Tentative

➤ **Migration Tool – General Availability**

Following feedback, the migration tool will be available to all customers. We'll provide guidance to help you choose when and how to migrate – independently or through a guided 8-week cohort.

H1 2026

➤ **Phased Decommissioning**

The migration tool will evolve to support full-scale migrations as we begin phasing out the original version of Happeo Pages – starting with minor bug fixes, then page creation, and eventually editing.

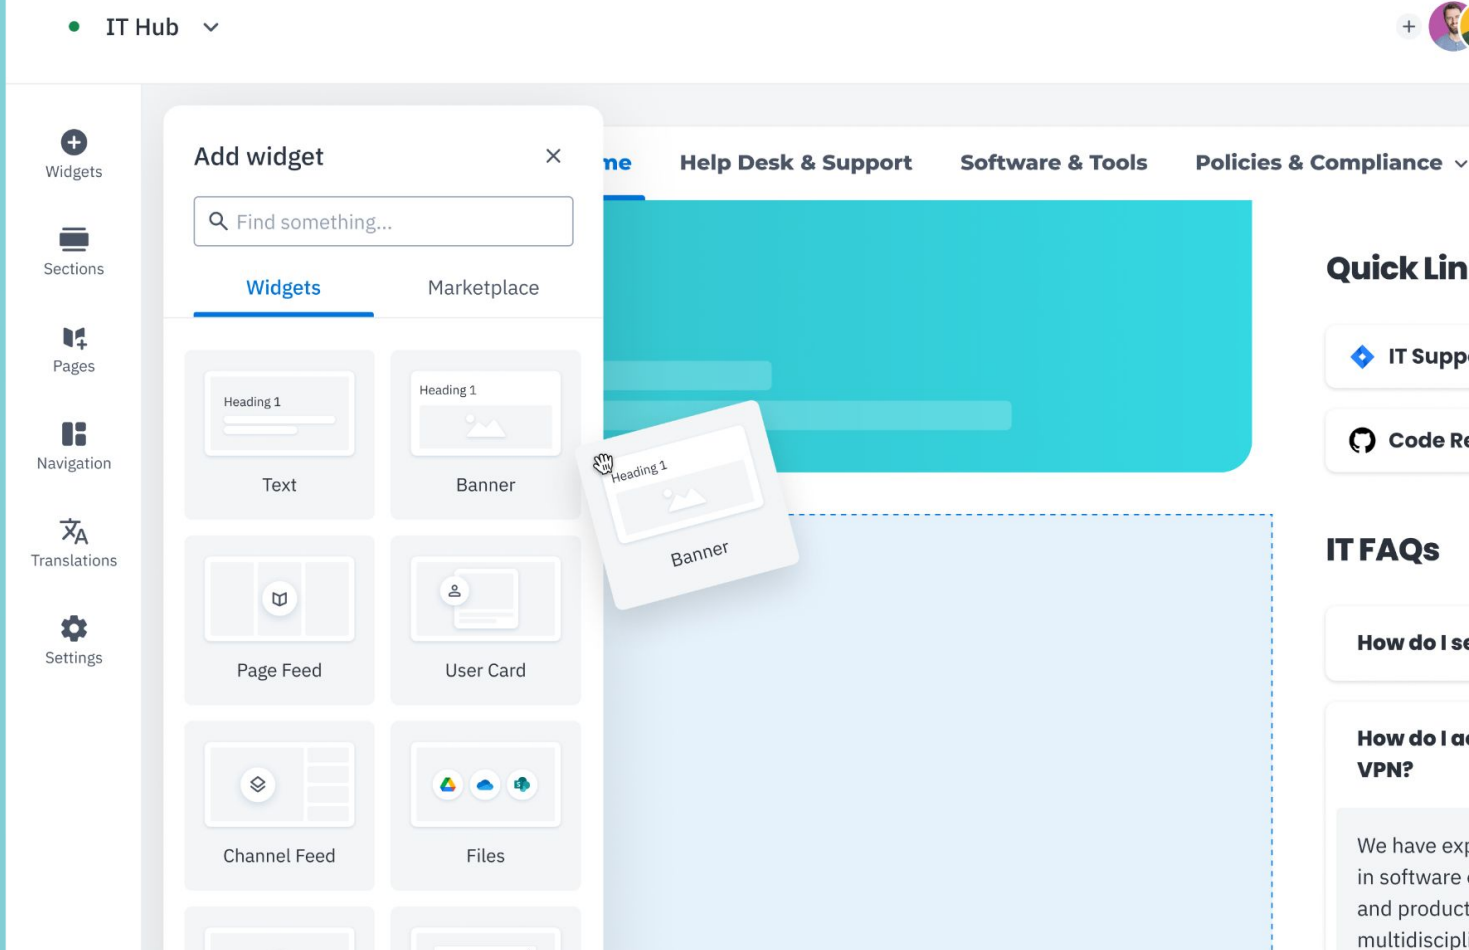

H2 2026

➤ **Final Migration**

Happeo will automatically migrate all remaining content from the original version of Happeo Pages to Pages 2.0 before decommissioning. You will be given plenty of advance notice.

Benefits & Improvements

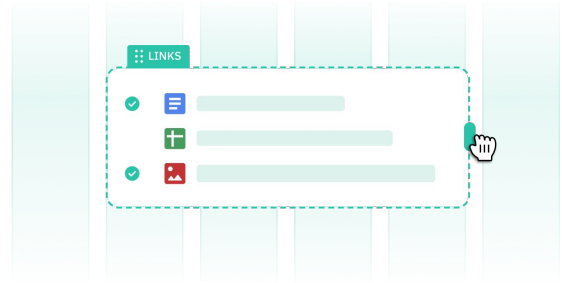

What's New

Drag & Drop Editor

Design pages faster than ever with our brand new drag-and-drop editor and 12-grid column layout for the most fluid page creation.

Flexible Layouts

Effortlessly build with 12-grid columns – stretch, resize, and move widgets within or across sections for complete layout flexibility.

Brand Styles

Ensure consistency across your intranet with Brand Styles. Choose the typography and colors that will apply to all Pages 2.0 in your Happeo.

Templates

Introducing our new Page, Page Group and Section Templates to help you create on-brand content quickly and easily.

Improved Widgets

Enjoy the widgets you know and love with enhanced functionality, and meet new additions including the Image, Table, and Spacer widgets.

AI Recommendations

Use AI to generate and refine text, find images from Unsplash, highlight people in your team, and quickly add files.

What's New

An illustration showing a document with a green checkmark and the text "All changes saved".

✓ All changes saved

Tracked Changes

Progress is protected every step of the way with auto-save, while undo and redo controls let you easily fine-tune your edits before publishing.

Page Versioning

Make edits in draft, keeping the live version unchanged until you're ready to publish. Easily restore previous versions with Page History.

Enhanced Navigation

Make the most of our enhanced Navigation section, designed to simplify Page Group management and improve user experience.

Linked Content

Never lose context when navigating. You can link to existing Pages without switching Page Groups, or direct to a public URL..

Improve Page Score

Make the following changes to improve findability

AI Page Review

Let AI guide you with recommendations to optimize your content before publishing, ensuring it surfaces in Happeo Search.

Pages Analytics

Seamlessly combines data from both versions of Happeo Pages, giving you a unified, holistic view of your insights.

What's New

Brand Style Locking

Maintain brand consistency by restricting key design changes while keeping essential flexibility in the editor.

Multi-Language Pages

Create and customize language variations of your pages. Go beyond translation – edit text and widgets to match each audience's needs.

Page Group Governance

Get better visibility over your content structures with significant improvements in the Admin Panel – complete with new filters and exports.

Migration Tools

IN BETA

Leverage our seamless page conversion tool to migrate your existing pages to Pages 2.0 – ensuring a smooth and effortless transition.

Custom Widgets

COMING SOON

Bring even more life to your pages with the ability to incorporate Custom Widgets to your content – available for Enterprise Customers.

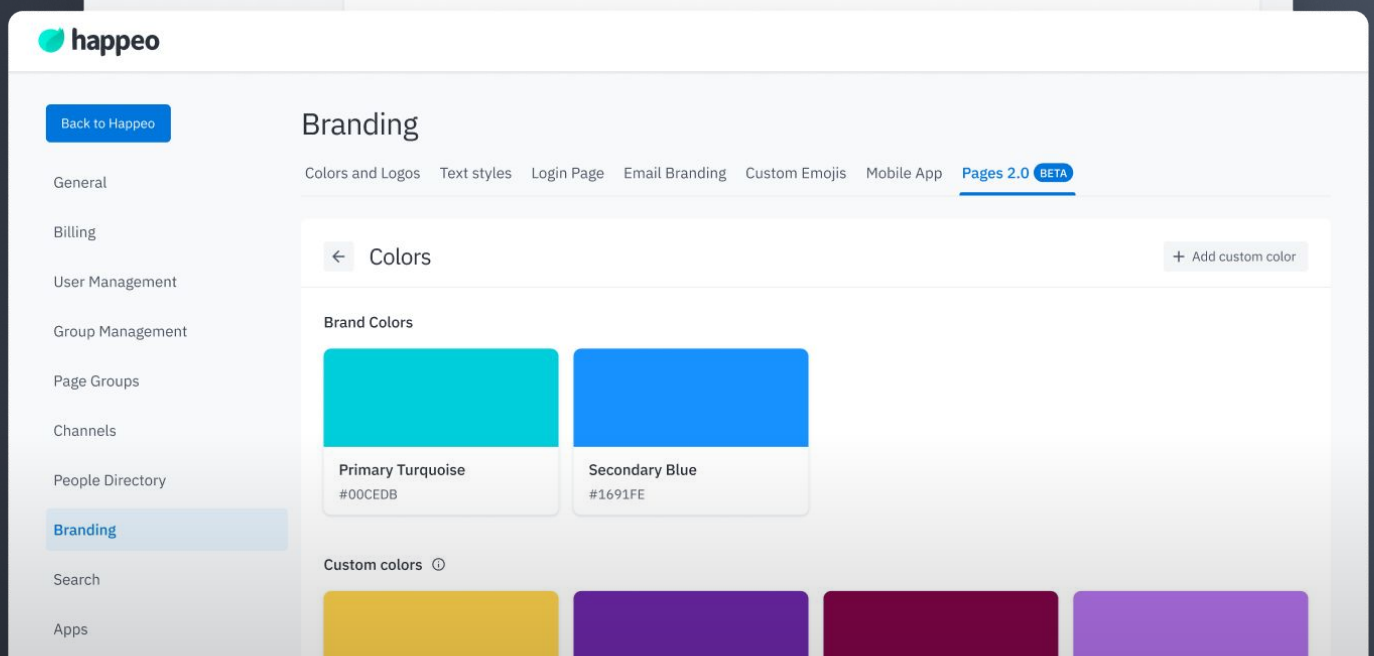

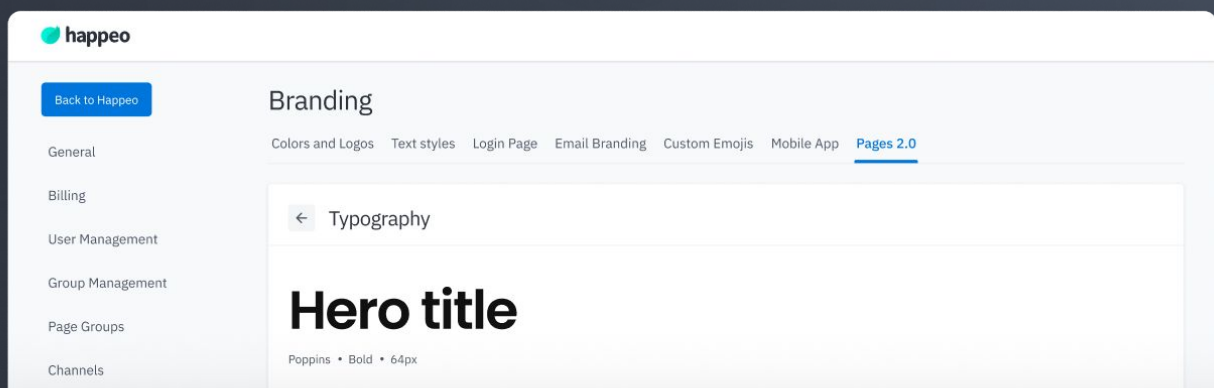

Marketplace Apps

COMING SOON

Find and incorporate widgets from your favorite tools within Happeo's App Marketplace, or make custom widgets to meet your content needs.

Brand Styles & Templates

Brand Styles NEW

What are Brand Styles?

[Brand Styles](#) define the look and feel of your intranet – including colors, typography, and the design settings of elements like Widgets, Sections, Headers, and Navigation. They are unique to Pages 2.0, and replace [Page Group Styles](#) from the original editor with a more consistent, global approach.

When a Brand Style is created and activated, every Page Group you create – whether from scratch or using a template – will automatically follow the design rules set in your active Brand Style.

Setting up Brand Styles

Admins and users with the [Branding Permission](#) can set up Brand Styles via **Admin Settings > Branding > Pages 2.0**. Only one Brand Style can be marked as **active** at a time – this is the default style applied to all new Page Groups. However, you can create additional Brand Styles and apply them to specific Page Groups from within the editor. This is useful for sub-brands, departments, or seasonal campaigns that need a different visual identity.

Define Your Brand Identity

Colors

Select five default colors or gradients that best fit your brand, and use them for Typography and Element settings. You can also incorporate custom colors and gradients to suit your needs.

Hero title

IBM Plex Sans • Medium • 64px

Heading 1

IBM Plex Sans • Medium • 48px

Typography

Choose from fonts configured in the Admin Panel, and set the size, weight, and color for different text types like headings and body text.

Elements

Define the default styles for Widgets, Sections, Hero, and Navigation to keep Pages consistent – including settings like padding, background colors, shadows, borders, and more. These can be customized within the editor – unless you decide to use the **Brand Style Locking** feature. [Learn more →](#)

Templates NEW

Streamline Content Creation

Templates save time and remove guesswork by providing ready-made content structures for your intranet. In Pages 2.0, we've introduced a brand-new set of [Page Group Templates](#), and you can also create your own to match your company's needs.

Exclusively in Pages 2.0, you'll also find [Page Templates](#) and [Section Templates](#). **Page Templates** let you save and reuse full-page layouts built for specific purposes, while **Section Templates** allow you to quickly insert reusable content blocks into any Page. These tools speed up content creation, promote best-practice formatting, and help keep your intranet consistent and on-brand.

Types of Templates

Page Group Templates

Created a Page Group with the perfect structure and layout? **Page Group Templates** let you turn your design into a reusable framework, making it easy to replicate success across your intranet. Whether it's the foundation of a departmental hub or a format you want teams to follow, let your best ideas inspire future creations.

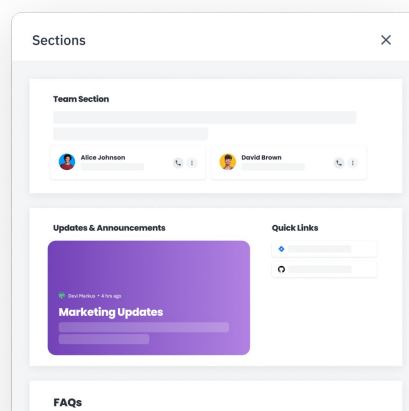

Page Templates NEW

Some Pages are so beautifully designed that it's a shame to use their layout only once! Save a Page you've created as a template and let others leverage the powerful formula you discovered with a strong layout, essential widgets, and all the necessary content—all while saving time.

Section Templates NEW

Pages 2.0 introduces Section Templates—reusable building blocks for your Pages. Don't hesitate—save sections designed for specific use cases as templates so others can apply your layouts, creating a unified and professional look while showcasing your design skills.

Create & Edit Pages

Creating content in Pages 2.0 feels familiar – like adding headers and widgets – but with a more intuitive, streamlined interface that makes it faster and easier than ever.

Below is a typical flow for building a page from scratch, but with Pages 2.0's flexibility, there's no right or wrong way – so get creative!

1

Set Up a Brand Style

Before creating content in Pages 2.0, setup and activate your first Brand Style to ensure consistency from the start. Define your company's colors, typography, and elements in Admin Settings. [Learn more →](#)

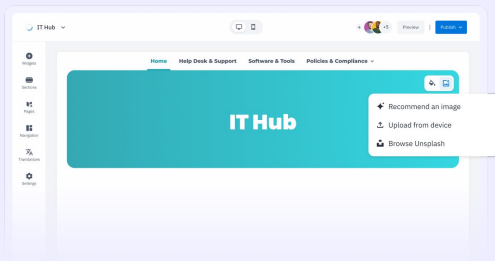

2

Get Started

Creating a Page Group follows a similar flow to our original editor. Simply select **Create 2.0 Page Group** and choose whether to begin from a template or start from a blank slate. [Learn more →](#)

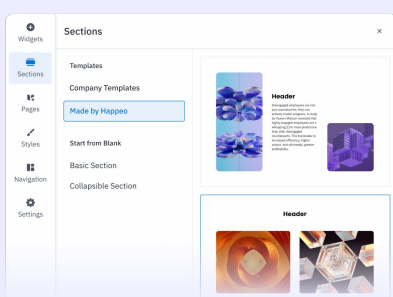

3

Customize Header

Next, customize your Header to align with the purpose of your Page Group. Define a clear title, and take advantage of advanced settings and AI-generated images. [Learn more →](#)

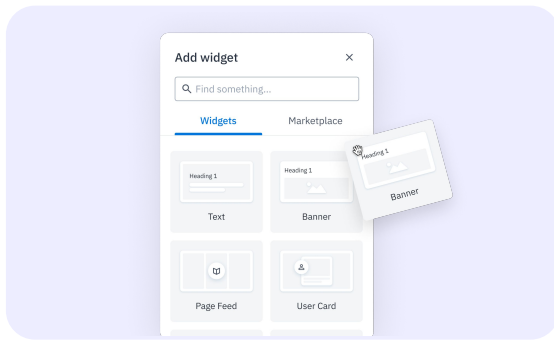

4

Add Sections NEW

We've significantly improved Sections, giving you the ability to customize and reorder them however you like. Add blank sections or explore our brand-new Section Templates. [Learn more →](#)

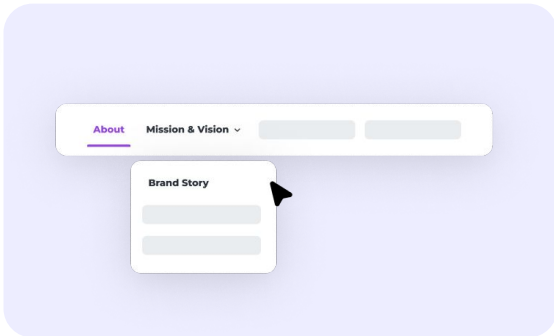

5

Add Widgets NEW

Easily drag and drop widgets into your content, resize them across a 12-grid column layout, and move them between Sections. Each widget has configurable settings, such as widget headers, to enhance searchability. [Learn more →](#)

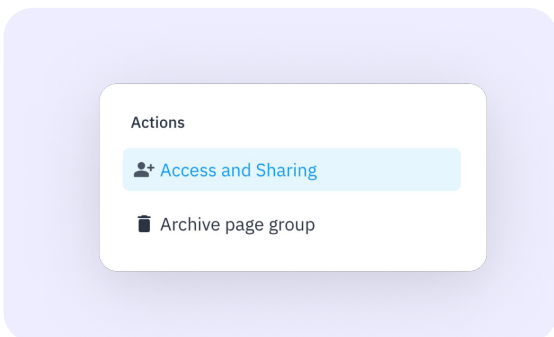

6

Customize Navigation

In Navigation, customize the color, location, and visibility of elements such as breadcrumbs, table of contents, and subpages. These changes apply automatically to your entire Page Group. [Learn more →](#)

7

Review Settings

Give the right people access to your content. Use Settings to define access for editors and viewers, tailored to your organization's needs. [Learn more →](#)

8

Review with AI

Use AI Page Review to refine your content before publishing – enhancing discoverability in Happeo Search. [Learn more →](#)

9

Preview & Publish

Preview your content, and once you're happy with the setup, hit Publish. You can always revert using Page History if needed. [Learn more →](#)

We recommend creating all new Page Groups in Pages 2.0 to take full advantage of this superior experience. As a bonus, this will also reduce the amount of content you'll need to migrate once the migration tool becomes available in Q4 2025.

Migration

Intrigued to see how our migration tool will work? Get a first look at how it will help you move content from the original Happeo Pages into Pages 2.0 – coming soon.

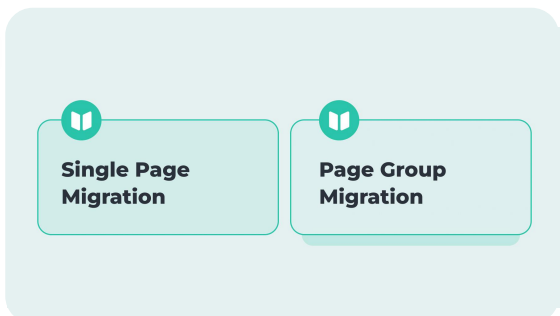

1

Transition Content

Visit the content you want to migrate, and click the Migrate button in the top-right corner. This will create a draft version of your existing content in Pages 2.0.

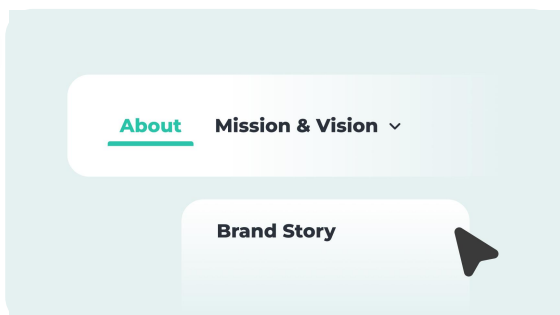

2

Single Page or Page Group

Choose whether you want to migrate a single Page or the entire Page Group. This will create Pages 2.0 drafts of your content. You will be notified if any widgets are unsupported.

3

Review & Refine

Check how your content has transferred and make any necessary refinements. Adjust Navigation and Settings to ensure everything is set up how you want it.

4

Optimize with AI

Use AI Page Analysis to enhance your content before publishing – improving discoverability in Happeo Search. [Learn more →](#)

5

Preview & Publish

Once you're happy with the setup, hit Publish. This replaces the original version, but you can always revert using Page History if needed. [Learn more →](#)

Rollout Checklist

Whether you're ready to jump into Pages 2.0 now or plan to ease into it, this checklist will help you prepare, train your teams, and communicate the change effectively.

Review User Permissions

Admins and users with the **'can create Pages'** permission can create new Page Groups in Pages 2.0. If you'd prefer to limit access during the early stages of your rollout, we recommend reviewing roles and permissions in **Admin Settings > User Management**. [Learn how →](#)

Share the News

Before teams start creating content in Pages 2.0 — and eventually migrate existing pages — build excitement internally. Use our ready-made [Communications Toolkit](#) included in this guide to help announce the launch and prepare users for what's ahead.

Set Up a Brand Style

enabled

Note: Pages 2.0 must be

Define your Brand Style early to ensure new content inherits your colors, typography, and element design defaults. Admins and users with the [Branding Permission](#) can manage styles in the Admin Panel, while editors can apply them in the new editor. [Learn more →](#)

Train your Team

Pages 2.0 is intuitive, and in-app guides make onboarding easy — but hands-on experience builds confidence. Once your Brand Style is active, create a test Page Group and give edit access to your content creators so they can explore and experiment in a low-stakes environment.

Communications Toolkit

This toolkit is designed to help you introduce Pages 2.0 to your teams – with clear messaging, helpful tips, and ready-made templates to get everyone excited, informed, and ready to use the new editor.

[Banner kit](#)

[Helpful visuals](#)

What you will find in this section:

- Key messaging to explain what Pages 2.0 is, what's changed, and why it matters
- Pre-launch templates for content creators and content consumers
- Launch announcement templates for content creators and content consumers

Key Messaging

What's coming

A new version of our intranet's page editor is here – built to make it faster and easier to create, update, and maintain Pages with a cleaner, more intuitive experience.

What's new

The new editor includes drag-and-drop tools, ready-made templates, and improved branding options – so it's faster and simpler to create engaging, well-structured pages.

What stays the same

All existing pages remain unchanged – you can view and edit them as usual. The new editor simply offers a better way to create new content moving forward, helping users find and engage with Pages more easily.

What to expect

If you're responsible for creating intranet content, you can start using the new editor for building pages. Anyone you add as an editor will also have access. Later this year, we'll begin moving our existing pages into the new editor, with dedicated tools to support our transition and guidance from Happeo.

Pre-Launch Email Template for Content Creators

Use this template to introduce Pages 2.0 to those with page creation permissions and responsibilities, highlighting what's new, why it matters, and how it will impact the way they build content within your intranet.

Setting the scene for Pages 2.0

Subject: A better way to build Pages is coming

Dear Team,

I'm excited to share that a powerful new Page editor is coming to **[Intranet Name / Happeo]**. Designed to simplify content creation, it introduces a drag-and-drop experience, reusable templates, and improved branding controls – all to help you create polished, consistent Pages with ease.

Here are some of the most exciting changes:

- **Fluid Page Creation** – A flexible drag-and-drop editor lets you move widgets freely, resize them using a 12-grid system, and structure content with ease
- **A Richer Editing Experience** – An upgraded widget catalog with more customization options for visually engaging pages.
- **Stronger Branding** – Apply our brand colors and fonts automatically using new 'Brand Styles' to ensure consistency
- **Enhanced Templates** – Use templates for Page Groups, Pages, and Sections to keep content clean and structured
- **More Control** – Auto-save, undo/redo – and page versioning to give you confidence when editing drafts before publishing

What does this mean for you?

You'll still have access to the original editor and all of our existing pages – nothing changes there. Starting from **[April 2]**, you'll also be able to create new pages using the new editor. Later, we'll look to migrate our pages to the new editor using migration tools to make the transition smooth.

I'm confident this upgrade will make a real difference in how we create and manage knowledge across the organization. Stay tuned for more info!

If you have any questions, feel free to reach out.

Best regards,
[Platform Owner / Admin]

Pre-Launch Post Templates for Content Creators

Use these templates to reinforce your Pages 2.0 communications to those with page creation permissions and responsibilities within a relevant Channel in your intranet.

These posts are designed to build excitement and awareness ahead of your rollout. Feel free to use them as inspiration, but adjust them to suit your overall communication strategy, goals, and needs.

When to use these posts:

Share them in the days leading up to your Pages 2.0 rollout – spaced a few days apart.

Introduction to what's coming

Something new is coming to **[Intranet Name / Happeo]** 👁️...

Hi team! We're excited to share that a brand-new page editor is coming soon to **[Intranet Name / Happeo]**!

What does this mean?

From **[April 2]**, you'll have the option to create page groups using the new editor – a more modern, flexible, and intuitive way to build content.

You'll still have access to the current editor, and existing pages won't be affected. But this upgrade brings a faster, more polished experience for creating on-brand pages. More updates coming soon – stay tuned!

An overview of what to expect

Get ready for a new way to build Pages 🚀

A powerful new Page editor is coming to **[Intranet Name / Happeo]** – giving content creators more flexibility, structure, and control when building intranet pages.

With drag-and-drop editing, improved layout tools, and smarter templates, it's now easier than ever to create polished, on-brand content that's engaging and easy to navigate.

You'll still be able to access and edit existing pages in the original editor. But moving forward, all new content will be built using the upgraded experience.

There's nothing you need to do just yet – but stay tuned for guidance and hands-on support as we roll it out!

Coming soon announcement

Ready for the new page editor? Launching soon! 🎉

We're just days away from the new page editor in **[Intranet Name / Happeo]**! It brings a more flexible, intuitive experience for building pages – with drag-and-drop editing, layout control, and smart tools to help you create cleaner, faster.

Before diving into the new editor, we will set up our company branding in the new editor so that any new Page Groups you create will automatically inherit our colors, typography, and design elements. After that, if you're planning to create new content in the new editor, please reach out so we can align on best practices for using the new experience going forward.

Importantly, the introduction of the new page editor has no impact on our existing pages – and we'll continue to have full access to the original editor for an extended period of time. We'll eventually move existing pages into the new experience starting later this year – more details to come on this.

Launch Announcement Templates for Content Creators

Use these templates on rollout day to let your content creators know the new editor is live and ready to use and explore. Encourage them to try out the intuitive new interface with a test Page Group.

Email announcement

Subject: Pages 2.0 is live – your new editor is ready to use 🎉

Hi team,

I'm excited to share that our brand-new Page editor in **[Intranet Name / Happeo]** is now live! You can start creating content using a more modern, flexible editor – with drag-and-drop tools, improved templates, and more control over layout and branding.

Here's what's new:

- A cleaner, more intuitive editor with full drag-and-drop layout control
- A growing library of templates for Pages, Page Groups, and Sections
- A more powerful widget catalog with greater customization options
- Auto-save, undo/redo, and versioning – so you can edit confidently

To get started, we recommend creating a test Page Group to explore the new setup. If you'd like help or want to align on best practices, just reach out.

More tips and resources coming soon!

Best regards,

[Platform Owner / Admin]

Post announcement

🎉 **Pages 2.0 is live!**

You can now create content using our brand-new Page editor with drag-and-drop tools, improved widgets, and smarter templates to help you move faster.

Try creating a test Page Group to get familiar with the experience – and reach out if you'd like support or best practices to get started.

Pre-Launch Email Template for Content Consumers

Use this template to let your content consumers and wider organization know that a new editor is coming – helping facilitate the creation of better pages, improved navigation, and more reliable content.

Setting the scene for Pages 2.0

Subject: Exciting Upgrade for [Intranet Name / Happeo]

Dear Team,

We're excited to share that from [Rollout Date], we'll be introducing a brand-new editor for creating intranet pages in [Intranet Name / Happeo].

While you won't be creating pages yourself, you'll still benefit from the improvements. Pages built in the new editor will be easier to read, navigate, and keep up to date – making your overall intranet experience smoother and more useful.

Here's what you can expect:

- **Cleaner Page Designs** – New layouts and design tools make content easier to read and understand.
- **More Consistent Branding** – Pages will follow our brand style more closely for a unified, professional look.
- **Easier to Find Content** – Improved structure and navigation make it simpler to find what you need.
- **Faster Updates** – Our teams can now update pages more efficiently, so the information you see is always current.

There's nothing you need to do – just keep an eye out for a fresher, more polished experience as new content is added.

We're excited to take this next step in [Intranet Name / Happeo]'s evolution and will keep you informed as the rollout continues.

If you have any questions, feel free to reach out.

Best regards,
[Platform Owner / Admin]

Pre-Launch Post Templates for Content Consumers

Use these templates to reinforce your Pages 2.0 communications to content consumers within a relevant Channel in your intranet.

These posts are designed to build excitement and awareness ahead of your rollout. Feel free to use them as inspiration, but adjust them to suit your overall communication strategy, goals, and needs.

When to use these posts:

Share them in the days leading up to your Pages 2.0 rollout – spaced a few days apart.

Introduction to what's coming

Exciting news for [Intranet Name / Happeo]!

Hi team! We're excited to share that from [April 2], we'll have access to a brand-new tool for creating pages in our intranet.

While you won't be creating pages yourself, you'll still benefit from the improvements. Pages built in the new editor will be easier to read, navigate, and keep up to date – making your intranet experience smoother and more useful.

We'll share more in the coming days – but for now, just know that a better experience is on the way!

 **Launch a poll to drive excitement!**

An overview of what to expect

A fresh experience is on the way 🌟

A new page creation experience is launching soon in [Intranet Name / Happeo]!

You won't need to do anything, but you'll start to notice some improvements across our intranet over the coming weeks and months.

Pages created with the new editor will have cleaner layouts, better structure, and more up-to-date content. Later this year, we'll also begin transitioning older pages to this new experience – all without disrupting your access to content.

Stay tuned for updates – and if you have any questions, feel free to reach out.

Coming soon announcement

The new page experience launches this week! 🎉

We're just days away from getting access to the new page editor in [Intranet Name / Happeo]! This means the people responsible for creating and managing pages will now have access to a more modern, flexible, and intuitive way to build content.

What this means for you

There's nothing you need to do, and your intranet experience will stay the same for now. Over time, you'll start to see some pages take on a fresher look and feel as we begin using the new editor for new content and gradually migrate existing pages. We'll always keep you informed as updates happen, so you'll know where to find the information you need.

If you have any questions, feel free to reach out!

Launch Announcement Templates for Content Consumers

Use these templates on rollout day to let your organization know the new editor is live. While the audience of these templates won't create pages, they will start seeing fresher designs and a more polished intranet experience.

Email announcement

Subject: Our new intranet experience starts today 🎉

Hi team,

We've officially launched a new version of our **[Intranet Name / Happeo]** page editor! While you won't be creating pages yourself, you'll start to see improvements across the intranet as new content is created using the upgraded editor.

What to expect:

- Cleaner, easier-to-read page layouts
- More consistent branding and design
- Improved navigation and structure
- Faster updates to the information you rely on

There's nothing you need to do — just enjoy the improvements as they roll out. We'll keep you posted as more updates go live!

Best regards,

[Platform Owner / Admin]

Post announcement

Our new intranet experience is here! 🎉

From today, our teams will start creating content using a brand-new Page editor in **[Intranet Name / Happeo]**.

New Pages will now be built using the upgraded editor, and over time, we'll begin moving existing pages into the new experience.

There's nothing you need to do – just keep an eye out for fresher layouts, clearer structure, and faster updates across the intranet in the months ahead!

FAQ

FAQ

General

What packages is Pages 2.0 available for?

All packages! Pages are core to Happeo, so everyone will experience the new editor. However, some AI features within Pages 2.0 (such as the Writing Assistant, Recommended Images from Unsplash, and AI User Card) will have package restrictions from the release of Pages 2.0, meaning you need to be on a Starter, Growth, or Enterprise plan.

Will we lose access to the original version of Happeo Pages?

Both versions of Happeo Pages will be available side-by-side for an extended period, ensuring access to your content. The original editor will be phased out gradually, starting with creation abilities, followed by editing, and full decommission in H2 2026 (tentative). We recommend creating new content in Pages 2.0 and using migration tools from Q3 2025 for a smooth transition.

Are there any compatibility issues with existing browsers or devices?

Pages 2.0 will work smoothly on most browsers and devices. We recommend using Google Chrome for the best performance, though Safari and Mozilla also work well.

Will there be disruptions to our intranet during the rollout of Pages 2.0?

We don't expect any downtime or disruption. Your intranet will be uninterrupted while Pages 2.0 becomes available.

Functionality

Will all existing page functionality be available with Pages 2.0?

Pages 2.0 retains the core functionality of the original editor but introduces a more flexible and intuitive way to build content. While the approach to some tasks has evolved, the new editor streamlines workflows to make content creation faster and easier, ensuring you have all the tools you need in an optimized experience.

How are Pages and Page Groups created in the new version?

The process of creating and managing Pages and Page Groups in Pages 2.0 is very similar to what you're used to in the current version. However, we've made user experience improvements to make it even easier. [Learn more →](#)

| | |
|--|---|
| Have there been any changes or enhancements made to Page Groups? | Yes, we've enhanced Page Groups with improved navigation, upgraded in-editor settings, and upcoming best-practice templates for Pages 2.0. Based on your feedback, we've also made improvements to linked pages for streamline navigation. |
| Is there a limit to the number of Page Groups and/or content that can sit within a Page Group? | The limits remain the same as today: you can create up to 4 levels within each Page Group. This structure helps keep content organized and easy to navigate, ensuring a consistent experience across your Pages. There is no limit to the number of Page Groups. |
| Will all of the widgets that exist in the current editor be available in Pages 2.0? | Most widgets will transition to Pages 2.0 with enhanced functionality, and we've introduced new widgets with AI-powered features. However, you will notice some changes, such as a few widgets being merged into one or moved to the Navigation panel. Others are still in development, and some widgets are no longer supported. For full details, please visit our Help Centre. Learn more → |
| Will improvements to widgets in Pages 2.0 be reflected in the original editor? | For the most part, widget improvements will focus solely on Pages 2.0, allowing us to deliver innovative features and enhancements without the limitations of the original editor. This ensures Pages 2.0 evolves into a more powerful and user-friendly platform tailored to your needs. |
| Does Pages 2.0 support widgets from third-party integrations? | Yes. By the end of Q3 2025, customers on Enterprise Plans can create custom widgets in Pages 2.0 – and Marketplace App widgets will also become available – though these widgets depend on your package. |
| Are there any performance optimizations in the new version that will benefit large-scale sites? | Yes. The new version of Pages 2.0 is built using React, a modern web technology that enables faster and more dynamic user experiences. In simple terms, React makes the site more responsive and efficient by only updating parts of the page that need changes, rather than reloading everything. This results in faster load times, smoother interactions, and overall better performance, especially for large-scale sites with complex content. |
| Will analytics be available for Pages 2.0? | Yes, analytics for Pages 2.0 will seamlessly combine data from both the old and new versions of Happeo Pages to provide a unified, holistic view of your insights. |

Are there any changes to access and permissions in Pages 2.0?

Access and sharing in Pages 2.0 work the same way as before. Owners, editors, and viewers remain the primary access types, while the "author" access type has been temporarily removed as we evaluate its necessity. You can manage access and sharing for your Page Group in the Settings panel of the Pages 2.0 editor.

Brand Styles

Who can set up Brand Styles?

Admins and users with the Branding Permission can configure and manage Brand Style for Pages 2.0. [Learn more →](#)

Are Brand Styles applied to content in the original Happeo Pages editor?

No. Brand Styles are exclusive to Pages 2.0. In the original editor, branding was applied manually through Page Group Styles, whereas Brand Styles provide a global way to apply consistent design updates across all Pages 2.0 content.

What happens if Brand Styles aren't set up?

Without Brand Styles, content will default to Happeo's style. While you can update it later, setting it up in advance ensures consistent branding from the start. It takes just 10–15 minutes to set up once, and all future content will automatically follow your brand style.

What happens if I change a Brand Styles already in use?

Updates to a Brand Style will automatically apply to all Page Groups using it, except for elements (like Widgets, Sections, Hero, or Navigation) that have been manually overridden. Once customized, those elements are disconnected from the Brand Style and won't reflect future changes – but you can easily reset them to reconnect to the core style. [Learn how →](#)

Can I change the Active Brand Style?

Yes – you can switch the Active Brand Style at any time. This is especially useful during a rebrand, allowing you to create a new style and apply it globally with a single click. [Learn more →](#)

What is Brand Style Locking?

This is a new feature coming to Brand Styles which removes the ability for editors to change the default styles of Widgets, Sections, Hero (Header), or Navigation. If a Brand Style is locked, all pages that inherit the Brand Style will strictly follow the locked design settings, ensuring full brand consistency with no overrides. [Learn more →](#)

Templates

Can our existing Page Group templates be used in Pages 2.0?

No, Page Group templates from the original editor can't be used in Pages 2.0. However, with the introduction of new Page and Section templates, redesigning your Page Group templates is the recommended approach to achieve optimal consistency across templates.

Will we still have access to Happeo-made templates?

Yes, but for Pages 2.0, we'll provide new templates inspired by best practices and key use cases for Page Group, Page, and Section templates.

Migration

What is the Pages 2.0 Migration?

Pages 2.0, released in April 2025, introduced a completely new page creation and editing experience. Customers who used Happeo before this date have existing content in the original version of Pages, which will be gradually decommissioned in H2 2026.

These customers will need to migrate their intranet content to Pages 2.0 using our migration tool when it becomes available.

How will migration to Pages 2.0 work?

We're developing a migration tool to move your content into Pages 2.0 with just a few clicks. It's currently being tested in the Pages 2.0 Beta Program, with general availability tentatively planned for October 2025. We'll provide regular updates, clear guidance, and the resources you need for a smooth transition.

What support and resources will be available to help us transition to Pages 2.0?

We've developed a clear, step-by-step migration approach that walks you through preparing your content, prioritizing what to move, training your team, migrating with the tool, and setting up ongoing governance in Pages 2.0. We're testing this approach during the Beta Program, and the final version will be available to all customers when the migration tool launches (tentatively October 2025). You'll also have access to [Help Centre](#) articles and videos, the [Pages 2.0 Community](#) – and we will launch weekly support sessions with our team.

Got a question?

If this guide or our [Help Centre](#) doesn't fully answer your question, feel free to join the dedicated [Pages 2.0 Community Channel](#) in Happeo. It's a space to ask questions, share ideas, and connect with others rolling out the new experience.
